15 October 1956

MEMORANDUM FOR: Project Director

SUBJECT: Responsibility for Publishing Supply Lists
(FAE and SLOE)

1. Reference your memorandum of 12 October 1956, Subject, Responsibility for Publishing Supply Lists (FAE and SLOE); during a meeting in the month of November 1955 with the 4070th SAC Support Wing it was established that SAC would assume the responsibility for the preparation and maintenance of authorization documents for this Project. With this in mind Project Directive 67-5 was written.

2. Should the 4070th Support Wing withdraw as an active member of this Project it will be necessary for the publication of these documents to be assumed by [REDACTED]. However, I would like to point out that the T/O for this organization does not contain sufficient personnel to assume this job. In addition, if this duty is levied on [REDACTED] personnel furnished through normal Agency personnel procurement channels would not be properly trained to assume this obligation. [REDACTED] and an airman presently working with him, have been living with this "live" problem for approximately one year. They are conversant with all the aspects of the problem involved. Should the 4070th withdraw its support I would recommend the personnel presently being utilized to maintain the support documents be withdrawn from the 4070th and assigned to this Project. It would be only in this manner that we could be assured that the personnel in the field had an up-to-date document from which to requisition their requirements.

25X1A

3. While SAC would probably not be amiable to the loss of these personnel it is only with the acquisition of them that we could assure proper support in the future.

25X1A

[REDACTED]
Director of Materiel
PCS/DCI
